

ELIAS YIRGA

Software Developer | Full-Stack & Application Development

+251946450062 | eliasyirga575@gmail.com | <https://eliasyirga.vercel.app/>

PROFILE

Recent Computer Engineering graduate with hands-on experience designing, developing, testing, debugging, and deploying web and mobile applications. Experienced in building RESTful APIs, database-driven applications, authentication systems, dashboards, and business-oriented software solutions using modern development technologies. Strong problem-solving and troubleshooting skills with the ability to learn new technologies quickly and work effectively in software development teams.

PROFESSIONAL EXPERIENCE

Software Development Intern — Alyah Software

APR 2025 – JUN 2025

- Developed and maintained application features according to project requirements.
- Worked on frontend and backend components of web applications.
- Integrated APIs and database-driven functionality.
- Tested application features and troubleshooted software defects.
- Participated in debugging and improving application performance and usability.
- Used Git/GitHub for source-code management and collaborative development.

Software Development Intern — Eagle Lion Systems

JUN 2025 - SEP 2025

- Assisted in developing and maintaining software applications.
- Implemented application features based on functional requirements.
- Worked with frontend and backend technologies.
- Identified and resolved software issues during development and testing.
- Participated in application testing and system implementation activities.
- Collaborated with other developers to deliver functional software solutions.

EDUCATION

BSc in Computer Engineering

MAY 2022 - JUN 2026

Bahir Dar University — Bahir Dar, Ethiopia

- GPA: 3.54/4.00
- Exit Exam Score: 77.5%

TECHNICAL SKILLS

Programming: JavaScript, Python, Dart, HTML5, CSS3

Frontend: React.js, React Router, Tailwind CSS, Vite

Backend: Node.js, Express.js, REST APIs

Mobile: Flutter

Databases: PostgreSQL, MongoDB, SQL

Authentication & Security: JWT, role-based access control, OTP/email verification, secure API practices

Tools & Technologies: Git, GitHub, Postman, Vercel, Render, Google Maps API

Software Development: Application Development, API Development, Database Design, Testing & Debugging, System Integration, Deployment, Documentation

SELECTED PROJECTS

BahirLink — Unified Emergency Response & Public Service Coordination System **Final Year Project | React, Flutter, Node.js, PostgreSQL**

- Developed a unified platform connecting citizens, emergency responders, and public-service agencies.
- Built RESTful backend APIs using Node.js and Express.
- Developed web dashboard functionality using React and mobile application features using Flutter.
- Designed and implemented a PostgreSQL database for users, emergencies, service requests, responders, agencies, notifications, and related data.
- Implemented JWT-based authentication and role-based access control.
- Integrated GPS/location functionality using Google Maps API.
- Developed emergency reporting, service requests, notifications, and dispatch-related functionality.
- Tested, debugged, and documented application features throughout development.
- Project received **Best Final Year Project** recognition.

Jobfiy — Job Marketplace Platform **React, Node.js, MongoDB**

- Developed a job marketplace application connecting job seekers and employers.
- Built responsive frontend interfaces using React.
- Developed backend REST APIs using Node.js and Express.
- Implemented authentication and database-driven functionality.
- Designed application features for job posting, searching, and user management.
- Tested application workflows and resolved frontend and backend issues.

Bonda — Used Products Marketplace **React, Node.js, PostgreSQL**

- Designed and developed a marketplace platform for buying and selling used products.
- Implemented user registration, authentication, product listings, categories, search, filtering, and seller functionality.
- Designed database structures for users, products, listings, and marketplace operations.
- Developed secure API endpoints and application workflows.
- Focused on usability, system reliability, and scalable application architecture.

CERTIFICATIONS & ACHIEVEMENTS

- **Cursor AI Hackathon — Participant**
- **Best Final Year Project Award — Bahir Dar University — *BahirLink: Unified Emergency Response & Public Service Coordination System***
- **Meta — React Development Certificate, Coursera**
- **Google — Python Certificate, Coursera**

PROFESSIONAL CLIENT PROJECTS

Marmik Consult PLC | Ethio Amber Trading PLC | Grove Link Consult PLC — Official Corporate Websites

- Designed, developed, tested, and deployed official corporate websites for three business clients.
- Built responsive, professional, and user-friendly interfaces optimized for desktop and mobile devices.
- Developed company profiles, services, business information, project portfolios, and contact sections.
- Implemented reusable frontend components and integrated required backend functionality and APIs.
- Troubleshot technical issues, performed cross-device testing, and maintained production-ready websites.
- Delivered real-world software solutions based on client requirements and business needs.

CORE COMPETENCIES

- Software Development
- Problem Solving
- Application Testing
- Debugging & Troubleshooting
- REST API Development
- Database Design
- System Integration
- Software Documentation
- Security Practices
- Team Collaboration
- Continuous Learning
